## INSTALLATION GUIDE

### Waterbridge Riser Extensions WB-ACC-LEG-EXT

This Accessory allows the overall height of the faucet to be adjusted up to 2-1/2" taller.

**Included in kit:**

- Qty 2 - Leg Extensions
- Qty 2 - 24" supply lines

**Tools needed:**

Pliers or similar

1. Remove brass retaining nuts and trim rings from risers.
2. Carefully unscrew both risers from the body of the faucet.
3. With pliers, remove the supply lines.
4. Install the longer supply lines that came with the kit. Hand tighten them first, then tighten an additional 1/4 turn.
5. Re-install the risers onto the faucet body.
6. Install the leg extensions onto the brass all-thread. This is where you will set the height.
7. Slip the trim rings back onto the all-thread and install onto counter. Finger-tighten the retaining nuts first before proceeding.

## INSTALLATION GUIDE

### Waterbridge Riser Extensions WB-ACC-LEG-EXT

8. Before tightening down fully, place a level across the handles and adjust the leg extensions as necessary to achieve a balanced height and ensure proper water flow.
9. To complete the installation, tighten down the retaining nuts fully.
